

*Praeses introduces its latest
Shipbuilding Product*

OneList

*The ONE application every shipbuilder needs
for ship lien management.*

OneList provides mobile and web enabled interfaces for real-time deckplate access to ticket data. Quickly enter, view, and close internal tickets — where and when you need it most — saving time and money.

Ticket Management Without OneList

For most shipyards today, ticket tracking is a laborious and time-intensive process that is typically paper-based. The Navy TSME database is the standard system currently used for trial card tracking. But with deficiencies such as required physical access and limited access to shipbuilder data, TSME is not optimal for use as a daily deckplate tool for ticket management and, more importantly, ticket resolution. Inefficient ticket management can result in rework, schedule delays, cost overruns, and a high rate of internal ticket conversion to TSME trial cards — all resulting in lost time and money.

Ticket Management WITH OneList

OneList allows for improved management of both TSME tickets and internal tickets, displayed in one common list, combined with streamlined workflow and near real time access. With support for a variety of mobile platforms and devices, tickets can be managed anywhere, anytime. All of the management capabilities of OneList are available in both disconnected and connected mode.

A Case Study

Proven, Real World Results. Tested and Validated.

On a recent program, when OneList was used, the result was a 60% reduction in trial cards over the life of the program, positively impacting delivery. In addition, OneList allowed for a staggering 98% decrease in Open Items at Sail Away, resulting in millions of dollars in savings due to the dramatic decreases in both trial cards and Open Items at Sail Away.

Using OneList during the certification process, HULL C received the highest aviation certification obtainable prior to sea trials. OneList is now being used across all ship programs at the shipyard.

OneList – The Solution Every Shipbuilder Needs

Learn more about how OneList can make your ticket management easier, improve data and workflow quality, and save you money.

Contact us at sales@praesesonelist.com or call 800.333.8856, and a member of our Shipbuilding Solutions Group will be happy to speak with you.

Resolve tickets in hours instead of days, minutes instead of hours. More importantly, resolve internal tickets before they are converted into trial cards!
